# COMICCRAFT

# Define Problem Statements

## Problem Statement

Creating a complete illustrated comic normally requires separate creative, writing, illustration, layout and publishing steps. ComicCraft addresses this workflow by combining AI story generation, image generation, layout construction and PDF export in one web application.

## Target Use

The project is designed to make comic creation accessible to non-artists, storytellers and hobbyists.

## Expected Outcome

A user can provide a creative idea and receive a complete comic experience containing panel images, narrative text and an exportable PDF.
