COMICCRAFT

Empathy Map

User Says

The user wants an easy way to turn a story idea into a comic.

User Thinks

The user wants the generated story and visuals to match the selected character, setting, tone and art style.

User Does

The user enters the story details, generates the comic, reviews the panel-by-panel preview and downloads the PDF.

User Feels

The application is intended to make the creative process accessible and engaging.

Pain Points

Manual story writing, illustration, panel organization and PDF preparation can require multiple separate tools.

Goals

Create, review, save and share a personalized comic from a single interface.
