COMICCRAFT

Solution Requirements

Functional Requirements

• Collect story prompt, character name, setting, tone and art style.

• Generate a structured five-panel outline.

• Generate narration and character dialogue.

• Generate illustrations for panels.

• Display a panel-by-panel comic preview.

• Compile the comic into a downloadable PDF.

• Provide API routes for comic generation and image testing.

User Flow

Input form → FastAPI processing → Gemini Flash outline → Gemini Pro story → Stable Diffusion images → layout builder → PDF export → success page.
