COMICCRAFT

System Architecture

Architecture Components

• Frontend: HTML, CSS and Jinja2 templates.

• Backend: FastAPI application and route handlers.

• AI Integration: Gemini APIs and Hugging Face Diffusers / Stable Diffusion.

• Layout and Export: layout_builder.py and exporters.py.

Module Responsibilities

• gemini_flash.py: structured five-panel outline generation.

• gemini_pro.py: full comic narration and dialogue.

• image_generator.py: comic-style illustration generation.

• layout_builder.py: combines images and story into a structured layout.

• exporters.py: creates the multi-page PDF.
