COMICCRAFT

Milestones & Activities

Milestone 1

• Research and select appropriate generative AI models.

• Define the application architecture.

• Set up the development environment.

Milestone 2

• Develop core functionalities.

• Implement FastAPI backend routing and input processing.

Milestone 3

• Write main application logic in routes.py.

• Set up route handlers and integrate AI workflows.

Milestone 4

• Design and develop the user interface.

• Create dynamic Jinja2 templates.

Milestone 5

• Prepare local deployment.

• Test and verify local deployment.
