COMICCRAFT

Installation Guide

Prerequisites

• Python and pip

• FastAPI and Uvicorn knowledge

• HTML/CSS/Jinja2 knowledge

• Gemini API familiarity

• Hugging Face Diffusers / Stable Diffusion

• PyTorch basics

• FPDF

• Git

• Python virtual environment

Environment Setup

Create a Python virtual environment, activate it, install dependencies from requirements.txt, configure the required API environment variables, and start the FastAPI server.

Run Command

uvicorn app.main:app --reload
